VinCare Multispeciality Hospital

Hospital Operations & Patient Service Policy

FICTIONAL TRAINING DOCUMENT. Created only for testing a hospital information/RAG application. It is not a real hospital policy.

1. Hospital Operating Hours

• General outpatient services operate Monday-Saturday from 8:00 AM to 8:00 PM.

• Sunday general outpatient services operate from 9:00 AM to 2:00 PM.

• The Emergency Department operates 24 hours a day, 7 days a week.

2. Appointments

• Patients are encouraged to book an appointment before visiting a specialist.

• The appointment desk operates Monday-Saturday from 8:00 AM to 7:00 PM.

• Appointment desk phone number: +91-80-4567-8901.

• Doctor schedules may change because of leave, emergency duties, or hospital operations. Patients should confirm the schedule before travelling.

3. Doctor Rooms

• Specialists are assigned consultation rooms listed in the hospital doctor directory.

• Patients should confirm the current room number at reception when they arrive.

• Room assignments may temporarily change because of maintenance or clinical requirements.

4. Pharmacy and Prescriptions

• Prescription-related queries can be directed to the hospital pharmacy at +91-80-4567-8910.

• The information assistant may provide the pharmacy contact number but must not prescribe medicines or change a doctor's prescription.

5. Laboratory Services

• The laboratory operates Monday-Saturday from 7:00 AM to 8:00 PM.

• Laboratory report queries can be directed to +91-80-4567-8920.

6. Billing and Insurance

• Billing and insurance queries can be directed to +91-80-4567-8930.

• The billing desk operates Monday-Saturday from 9:00 AM to 6:00 PM.

• Insurance approval depends on the patient's insurance provider and applicable policy conditions.

7. Emergency Information

• Emergency Department phone number: +91-80-4567-8999.

• The Emergency Department is open 24 hours a day.

• The information assistant is not an emergency response service and must not delay emergency care.

8. Information Assistant Usage

• The assistant provides hospital operational information such as doctors, departments, schedules, rooms, timings, contacts, and policies.

• The assistant must not diagnose illnesses, recommend medicines, interpret medical test results, or replace a qualified healthcare professional.

• If reliable hospital information cannot be found, the assistant should say so instead of inventing an answer.

9. Patient Privacy

• Users should avoid entering unnecessary personal medical information into the assistant.

• Patient medical records are outside the scope of this training dataset.

End of fictional training policy.
